CVS gives you the facility to re-equip your route of out-dated video games in one single operation. Everyone is aware now that the 'novelty syndrome' has taken over - no matter how good the new

game is - if only has a short site life, and then it becomes a liability. After stating the obvious, here are the facts. Over twenty specialist companies throughout the U.K. are now converting all types of

videos, upright, table top, black and white, colour or XY to the programmable Century Video System. Up to the minute games are produced every 6 - 8 weeks so giving you plenty of variety to choose and

program your changes. To change from one game to another is a simple matter of changing a module and flash (In some cases also a button bank unit). Tomorrows products today, from Century.
